Seawalls and Wrecking Balls: Overcoming Barriers to Making CMSP Climate-Smart

Jessi Kershner, Lead Scientist jessi@ecoadapt.org

Stephanie Moura, Executive Director smoura@seaplan.org

How has climate been addressed in CMSP so far?

- As an isolated issue
 - E.g., climate adaptation plan or recognized but not addressed
- Only in part
 - E.g., one or two climatic changes considered
- Existing plans adjusted
 - E.g,. Great Barrier Reef Climate Change Action Plan

Why are climate considerations missing from CMSP?

- Lack of climate or key information?
- Lack of institutional support/governance?
- Lack of institutional capacity?
- Uncertainty about what will happen and what to do?
- Lack of economic or technological resources?
- Lack of guidance how do we incorporate this stuff??

Climate-Smart CMSP Symposium and Working Group Goals

Symposium

- Introduce straw man framework for climate-smart CMSP
- Present climate-smart CMSP examples

Working Group

Wednesday, 4/3, 1:30–5pm; Molly Brown

- Best practices for incorporating climate into CMSP
- Key barriers to implementing climate-smart CMSP
- Actionable and pragmatic options for overcoming barriers

Symposium Speakers

- Stephanie Moura
 - Executive Director, SeaPlan
- Thomas A. Okey, PhD
 - President, Ocean Integrity Research
 - Adjunct Professor, University of Victoria, Canada
- Pam Rubinoff
 - Coastal Extension Specialist, University of Rhode
 Island Coastal Resources Center
